

ORGANIZING YOUR CHILD'S CLOSET

INFANT

- Store onesies folded on a shelf, in a drawer, or rolled up in a basket.
- Use hanging space for your cutest baby clothes in your baby's current size while storing out of season or larger sizes in out the way baskets up top.
- Tiny shoes need storage that keeps pairs together so try a basket that helps you keep them in one easy place.

CHILD

- Keep the peace over mismatched socks and simply toss every clean sock in a basket without matching them up.
- Store sock baskets with shoes so it's easy for your child to find and choose both.
- Make room for that growing collection of bows by including pull-out rack that they can easily reach.

ADOLESCENT/TEEN

- Avoid "Mom, I don't have anything to wear!" meltdowns by hanging skirts and shirts together.
- Stock the top shelf with an overnight bag and baskets with packing supplies for those weekend sleepovers that become routine.
- Hang jeans and leggings, freeing up drawer and shelf space for sweatshirts and personal items.
